The Florida State University
College of Social Sciences and Public Policy

invites you to a lecture by:

Daniel Aldrich
Professor and co-director of the Security and Resilience Program
Northeastern University

Earthquake, Tsunami, and Nuclear Meltdown: Survival and Recovery in Japan’s 3/11 Event

Monday, February 1, 2016
4:00 to 5:30 pm

The Pepper Center’s Broad Auditorium
Corner of West Call St. and Convocation Way on FSU’s Campus

Professor Aldrich will speak on Japan's commercial nuclear power program, one of the most advanced in the world, and the crisis in the Fukushima nuclear complex following the earthquake and tsunami of March 2011, which has dramatically altered the political and social landscape for energy in Japan.

Aldrich has published four books, more than 30 peer-reviewed articles, and written op-eds for the New York Times, CNN, and many other media outlets. His research on post-disaster recovery, the siting of controversial facilities, and the interaction between civil society and the state has been funded by the Fulbright Foundation, the Abe Foundation, and the National Science Foundation. He has carried out years of fieldwork in Japan, India, Africa, and the Gulf Coast.

In 2011, the Purdue Exponent named him among the Top 5 Professors who have influenced international and national events. In July 2012 his New York Times op-ed on disaster recovery was named as one of the five best columns in the Atlantic Wire.

Sponsored by the
Ruth K. and Shepard Broad International Lecture Series

FREE AND OPEN TO PUBLIC
Parking is available in FSU’s multi-story garage on the corner of Macomb and West Call Streets.
